

ELITE II PRO SERIES MANUAL PRESSES

The professional Elite Series II Screen Printing Presses are a proven workhorse. Designed for heavy duty use with its large screen frame capacity of 25" inches and comes loaded with features that would be an asset in any screen printing shop. Easy and fast to setup multi color screen printed designs. Tool free adjustments for lift spring tension, micro registration, screen angle, off contact, and platen leveling. Each print head has warp screen adjustment. A Steel key glides into 2 roller bearings which holds perfect registration from color to color.

- ◇ E-8800 – 8 colors 8 station

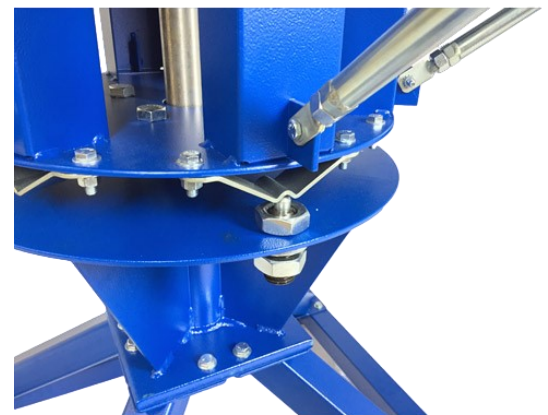

The Elite Series II Presses are manufactured in house in the USA from the finest quality materials. All sheet steel parts are punched with CNC computer control punch press, and then formed to close tolerances. All tubular steel parts are welded using jigs to ensure consistency. Our aluminum parts are precision machined to close tolerances. The screen back clamp is extruded aluminum for strength with minimal deflection. All parts have a powdered coat finish and are assembled by hand to ensure easy set up of the press, increased production and a trouble free life.
